Carbon Reduction Plan

Supplier name	**SR Supply Chain Consultants Ltd**
Publication date	**6th November 2026**

Commitment to achieving net zero

SR Supply Chain Consultants Ltd is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.
Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2023

Additional details relating to the baseline emissions calculations:

Note: Calculations are based on industry-standard conversion factors and reflect office-based and hybrid operations with a focus on digital delivery.

Direct Emissions (gas)	Scope 1
Purchased Energy (electricity)	Scope 2
Business Travel (car/train/mileage)	Scope 3
Commuting	Scope 3
Digital delivery (estimated impact)	Scope 3
Paper and printing	Scope 3
Waste (office)	Scope 3

Baseline year emissions:

Emissions	Total (tCO2e)
Scope 1	2.64
Scope 2	0.68
Scope 3 (included sources)	11.7
Total emissions	15.02

Current emissions reporting

Reporting year: 2026	
Emissions	TOTAL (tCO2e)
Scope 1	2.586
Scope 2	0.623
Scope 3 (included sources)	10.850
Total emissions	14.059

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 13 tCO2e by 2031. This is a reduction of 13.33%.

Net Zero Target

31st October 2050 with 2035 as an interim milestone

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to 0.961 tCO2e, a 6.3% reduction against the 2023 baseline and the measures will be in effect when performing the contract.

Since 2022, we have implemented the following actions:

- Transitioned to a **hybrid working model** to reduce commuting.
- Delivered **80% of training virtually**, reducing travel.
- Switched to **green energy tariffs** for office premises.
- Introduced **efficient lighting.**
- Implemented a **paperless operations policy**.
- Source locally where possible.
- Introduced **carbon-conscious travel policies** (e.g. train over car where feasible).

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Annual carbon footprint audits.
- Introduction of carbon literacy for all staff by 2028.
- Engaging suppliers to adopt greener practices.
- Further reduction of printed materials and branded merchandise.
- Exploring options for carbon offsetting where unavoidable.
- Increase virtual training further.

In addition, organisations with which SRSCC Ltd do business with, will be encouraged to support and adopt these principles within their own sphere of business activities.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.[15]

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:
